Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant argued that the Li and Fijolek references do not teach obtaining, using the secondary signaling technology, a unique link identifier, the Examiner noted argument and advised Applicant the following. One the references should be look at in combination for all they contain. Although the precise column and line numbers quoted may not indicate that the 'unique link identifier' (i.e. which Applicant's specification indicates can be a customer telephone number) this is obviously understood in the context of the two inventions. Li teaches automatic configuration process for Internet access devices at customer premises. It is recommended that the independent claims be amended to include more details from the specification..
